                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               FUNCTION: CYTOCHROME B5 IS A MEMBRANE BOUND HEMOPROTEIN WHICH FUNCTION AS AN ELECTRON CARRIER FOR SEVERAL MEMBRANE BOUND OXYGENASES. MAY PLAY A KEY ROLE IN THE MODIFICATION BY DESATURATION OF FATTY ACIDS IN THE ENDOPLASMIC RETICULUM, WHICH IN THE DEVELOPING SEED IS UTILIZED FOR MEMBRANE SYNTHESIS AND IN THE DEVELOPING SEED IS UTILIZED FOR MEMBRANE SYNTHESIS AND IN THE DEVELOPMENTALLY REGULATED PRODUCTION OF LARGE AMOUNTS OF STORAGE LIPIDS. IS INVOLVED IN THE REDUCTION OF CYTOCHROME P-450 AND MAY THEREFORE BE INVOLVED IN FLAVONOID BIOSYNTHESIS IN THE PETALS. SUBCELLULAR LOCATION: MICROSOMAL MEMBRANE. BOUND TO THE CYTOPLASMIC SIDE OF THE ENDOPLASMIC RETICULUM (BY SIMILARITY). TISSUE SPECIFICITY: IS HIGHLY EXPRESSED IN DEVELOPING SEEDS, MODERATELY EXPRESSED IN FLOWERS, AND IS EXPRESSED AT LOW
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  nt Mol. A;Title: A sphingolipid desaturase from higher plants. Ide
A;Reference number: Z22986; MUID:99003197
A;Accession: T51848
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: mRNA
A;Residues: 1-449 <SPE>
A;Cross-references: EMBL.AJ224161; PIDN:CAA11858.1
A;Cross-references: EMBL.AJ224161; PIDN:CAA11858.1
A;Experimental source: cultivar Columbia; mainly green par C;Genetics:
A;Gene: sld1
A;Map position: 3
A;Note: F2A19.180
C;Function:
A;Description: (EC 1.14.99.-); delta-8 sphingolipid desatu C;Keywords: oxidoreductase; unsaturated fatty acid biosynt
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          T47950
delta-8 sphingolipid desaturase (EC 1.14.99.-) [validated] - Arabidopsis thaliana delta-8 sphingolipid desaturase (EC 1.14.99.-) [validated] - Arabidopsis thaliana (Reconstruction of the construction                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       A;Cross-references: EMBL:AL132962; PIDN:CAB71088
